SECTION 12 PAGES

NUMBER 45

educational opportunity. Children's needs vary according to the individual differences. Those characterized by accentuated deviations in physical, mental, and emotional developments have unique patterns of learning; therefore, appropriate techniques and methods of instruction must be employed to satisfy the educational requirements of exceptional children. Educational programs for exceptional children are designed to encourage each individual to develop his potential, provide preparation for citizenship, employment and economic self sufficiency.

Title I has enabled the Coffee County School System to place 5 additional special education units in the schools of Coffee County. These units have enabled Coffee County to have at least one special educational unit in each school.

Before children were accepted into the Title I special education classes they were tested by a state approved psychologist. It was on the basis of test results compiled by the psychologist that these children were recommended for placement in the program. The procurement of the psychologist was also a benefit of Title I.

Special Education classes are limited to 15 students per class. Because there is a cross section of grades and ages most classes are further divided into small groups in order to meet individual differences. A considerable block of time is spent on the basic skills of reading, spelling, oral language, writing and arithmetic. Among many and varied materials being used are the Peabody Language Development Kits, the Alpha One Program, the Distar Program, filmstrips, transparencies, books and workbooks. One especially interesting highlight in an upper elementary special education class has been the DOT (Diet's Our Thing) program in cooperation with Auburn Extension Service in which a group of 7th grade 4-H girls taught a series of nutrition programs and showed students how to prepare healthful, nutritious and well balanced meals under the direction of Mrs. Myrna Rhodes, Extension Home Agent. We are deeply grateful to the Auburn Extension Service for this support of our program.

meals under the direction of Mrs. Myrna Rhodes, Extension Home Agent. We are deeply grateful to the Auburn Extension Service for this support of our program.

**PRESCHOOL PROGRAM**

Additional Title I money received in January, 1972 led to another meeting with our principals and the Title I Advisory Committee from each of the county schools. Since there was not enough money to operate a summer school program in each Title I School and since the cost of busing students during the summer months was prohibitive the decision was made to operate a 6 week kindergarten program for eligible Title I students in 5 of the 6 county schools. Since a Head-Start Program had been in operation for the entire school year at New Brockton the decision was reached that there would not be enough eligible children in that area to justify a class there.

The kindergarten program began on April 10, 1972 and operated through May 19, 1972. The preschool children are children who will be 6 years old by or on October 2, 1972 and eligible for first grade. They have enjoyed many new and varied experiences. They have been transported to and from school on the same buses as the other children. This has involved them in a full day of school but ample rest periods were provided. The kindergarten program has provided a continuity of experiences which promoted growth, challenged thinking, and encouraged the development of new skills, cognitive, affective and psychomotor.

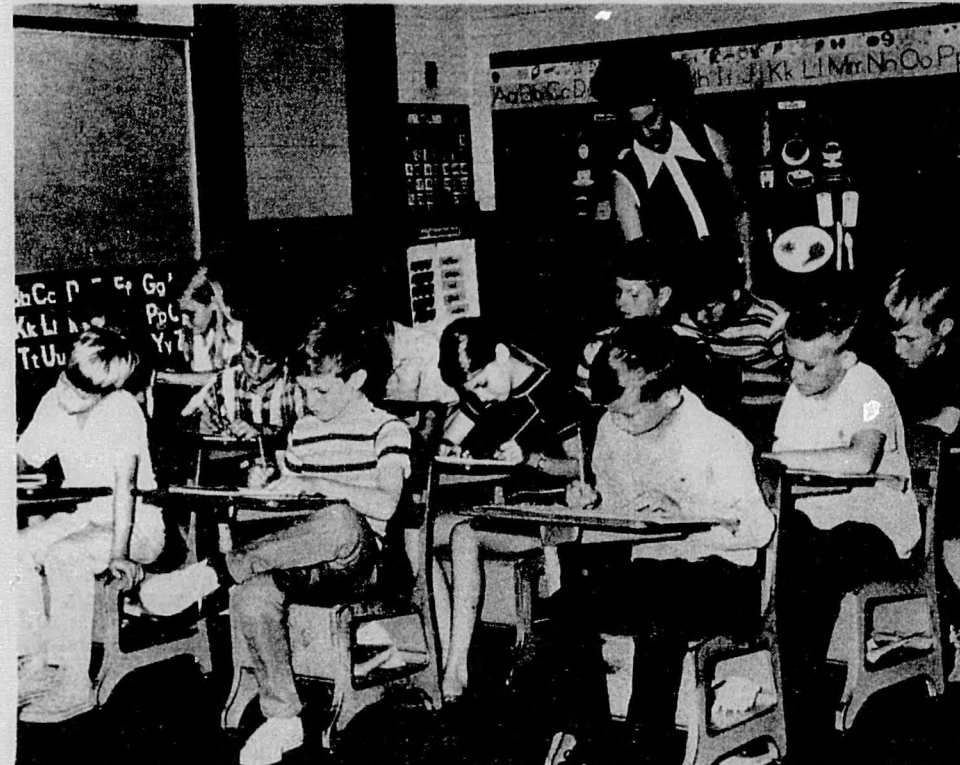

Two goals of the kindergarten were the development of a positive self image and the development of the child's ability to communicate through the expression of his ideas and his feelings. Public support of the Title I Pre-school program has been excellent. Parents have been very cooperative and when we consider the importance of early childhood development we feel that this program has greatly strengthened the educational program of Coffee County.

Mrs. Patey Britt, Title I Reading teacher, works on vocabulary, using word wheels and consonant blends to make new words at Mt. Pleasant Junior High School.

A teacher-aide under the O.E.O. program helps work with a group of pre-school children at Kinston High School.

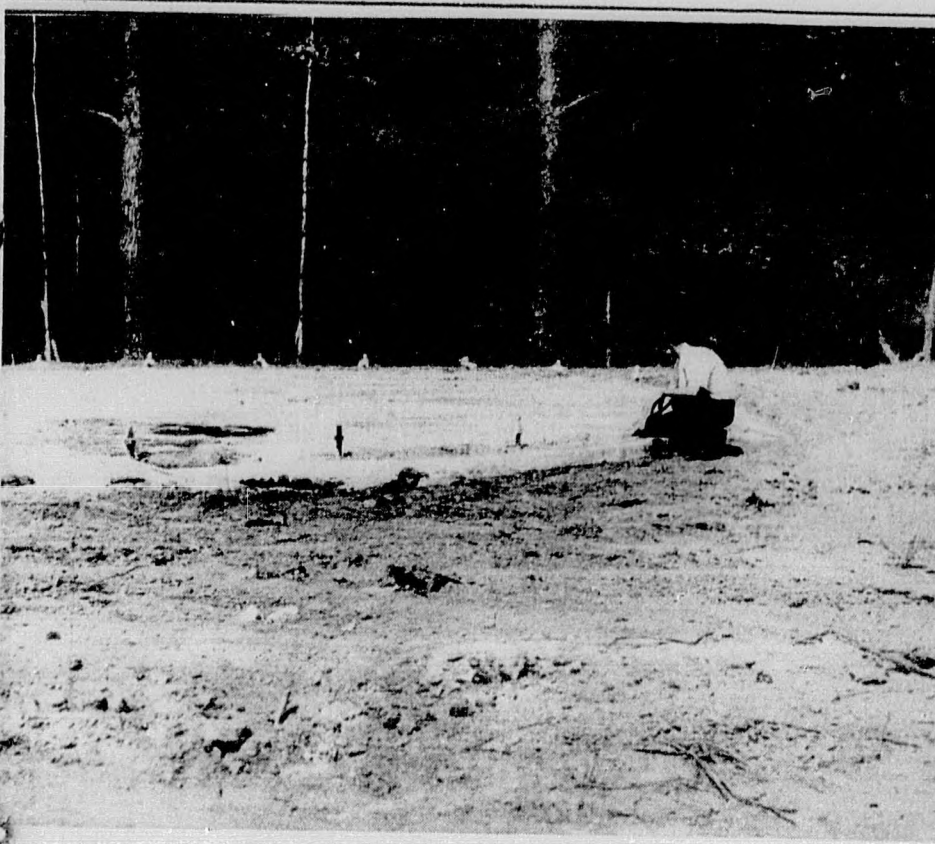

Mrs. Melinda Sanders, Title I Reading teacher, uses "Listen and Think" tapes with a 6th grade Title I group at New Hope Junior High School.

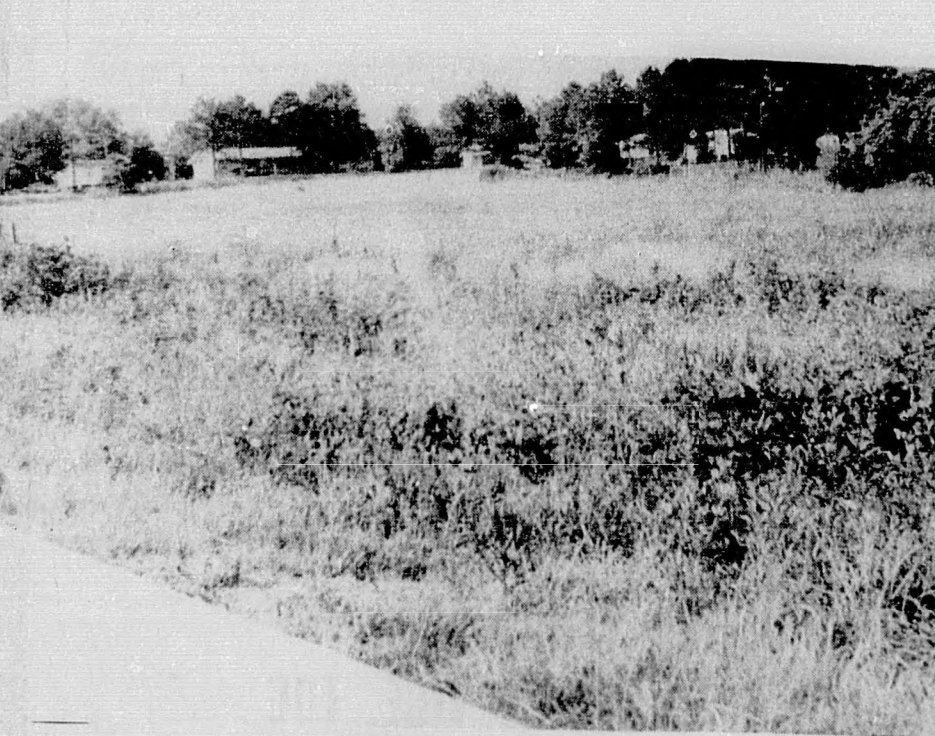

Mrs. Myrtle L. Pierce works with a third grade Title I Reading class at Kinston High School.

FINALLY the proposed street from the Dorsey parking lot on the Opp Highway to the Taylor Mill Road has become a reality. With City and County forces cooperating, the heavy congestion of traffic on Highway 84 during the early morning rush and even greater in the evenings has been relieved, if only slightly. With this new street, all the traffic going toward Pine Level, Brantley and other points north of Elba can avoid the bottlenecks of traffic entering Highway 84 and traveling along that highway. Planning officials note that they plan to complete the paving on this street before the summer is over.

CITY CLERK TOM DYESS SURVEYS RECREATIONAL IMPROVEMENTS

SITE OF FUTURE MULBERRY PARK

The City of Elba, Alabama has received a grant of \$60,000 from H.U.D. (Dept. of Housing and Urban Development) and have made plans to purchase sites and develop five neighborhood parks for the use of the general public. All sites are to have approximately the same general development and recreational facilities.

The five parks are: The American Legion Park, Mul-

berry School Park, River Park, Hudson Property Park, and the Lawford Property Park. The American Legion Park will be the largest Park, containing slightly over six acres. The Jaycees Baseball Park, near Cook Chevrolet will be moved to a new location at the American Legion. Slight modifications of the American Legion baseball field will be required, but according to the City Clerk

Tom Dyess, everything should work out fine. There will also be basketball equipment, a bar-b-que area, and an outdoor pavilion for skating, dancing, picnics hand concerts, and other events.

The other recreational areas, although they will be somewhat smaller, will have basically the same equipment and will be located near a local neighborhood.

## PAGE AIRCRAFT IS SOLD TO NORTHROP

Northrop Corporation announced today it has acquired for cash all of the assets of Page Aircraft Maintenance, Inc., an Oklahoma based firm known in the aircraft maintenance and support services industry as Page Aircraft Maintenance, Inc. The purchase price was not disclosed.

In making the announcement Northrop said the firm is being renamed Northrop Worldwide Aircraft Services, Inc. Northrop sees the acquisition as a means of complementing and extending its present extensive aircraft support services operations for U. S. and Allied Government Agencies. Further growth of the aircraft maintenance and support market is anticipated as a result of a trend toward greater use of contract civilian personnel, rather than military personnel for aircraft maintenance.

Current annual sales of PAMI are running slightly in excess of \$20 million. The company has a long record of profitability. PAMI has approximately 2,000 employees assigned to contract aircraft and helicopter maintenance operations at Fort Rucker, Alabama, the U. S. Army's Major Aviation Training Center, Fort Monmouth, New Jersey, where the Army maintains a fleet of helicopters for avionics flight testing; Fort Stewart, Georgia, home of the Army's Advanced Helicopter and Fixed Wing Training Programs; Fort Huachuca, Arizona, The Home of the Strategic Communications Command; Dugway Proving Ground, Utah; and White Sands Missile Range, New Mexico. In addition, the company is performing several helicopter support contracts for the U. S. Forest Service and performing other commercial aircraft engine overhaul work as well.

PAMI was founded in 1957 and was named for its principal founder, E. Page, a prominent Oklahoma Aviation Leader. The company is not related to another Northrop subsidiary, Page Communications Engineers, Inc., of Vienna, Virginia. Company headquarters are at Lawton, Oklahoma.

PAMI will be operated as a unit of Northrop Corporation's Aircraft Division, Hawthorne, California, which in addition to manufacturing jet aircraft assemblies, provides aircraft support services on a worldwide basis.

Wolke E. Gotsch, Vice President and General Manager of the Aircraft Division, has been named Chairman of the Board. He replaced Mr. Page, who resigned to pursue other business interests.

Rex H. Madeira, PAMI President, will continue in that capacity under the new ownership.

A. L. Charipar, General Manager of the Fort Rucker Division, advises that the acquisition will not alter in any manner the current operations. The impact locally will be one of a name change with no changes in the incumbent management.

Local citizens who would like their signatures on the "Get Well Card" for Governor George Wallace are reminded that the card is located at Daniels Gulf Service Station.

The card was custom made by a Coffee County citizen and will be transported to Governor Wallace when everyone has had ample time to sign their name.

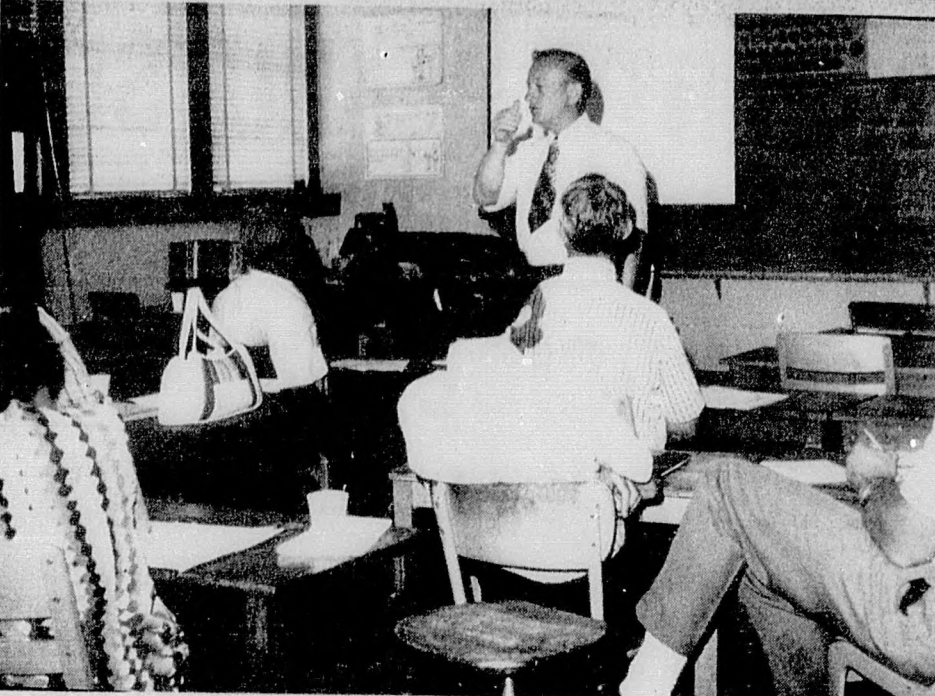

## REScue REPORT

The Elba Rescue Squad answered 4 local calls, from May 29, 1972 through June 4, 1972 involving 9 man hours and a distance of 98 miles. Also they had one call to Blountsville, Florida involving 240 miles and 85 man hours.

Advertising of Dorsey Trailers in a national trucking industry magazine scored the highest readership in Chart Services, the research organization that conducted the study. The above photo shows presentation of a plaque commemorating the achievement.

Left to right: Chester Herrington, advertising director of Commercial Car Journal; Frank A. Muller, Dorsey Vice President, sales, and Morris Timbes, president of the company's advertising agency, Timbes & Yeager, Inc.

TEACHERS ATTEND WORKSHOP AT LOCAL SCHOOL

Forty-five teachers including the Elba High School Staff and representatives from the elementary and middle schools attended a three-day workshop at the local high school June 5-7. The purpose of the workshop was to acquire techniques and procedures for developing materials for individualization of learning, expediting the use of these materials in the classrooms, and designing instruments of evaluating and reporting pupil progress.

Dr. Gardner Swenson of the Teachers Union Exchange (TUE) - an association of consultants, Salt Lake City, Utah provided the expertise in knowledge and skills in the preparation and production of individualized instructional materials for the forty five local teachers. Other consultants were provided by the Pamlico Area Educational Cooperative (PAEC) in Blount, Florida.

The workshop organized and conducted the workshop utilizing the following techniques: Establishment of behavioral objective, Team teaching by the team consultants, Flexible scheduling techniques during the workshop, Grouping of participants to achieve their specific instructional objective, Multi-media environment, Independent study, and Non-gradedness.

Dr. Swenson and his staff also provided consultant services on a basis of adequate to meet the needs of the teachers in the workshop. Such services shall include working with individuals, teams, and the total faculty in the application of such techniques as may be deemed suited to the needs of the pupils and assisting the participants in developing educational programs and materials necessary for enhancing individual differences in the instructional program.

The local system has been engaged in reorganization of curriculum for several years through the in-depth programs of in-service for the implementation of an individualized instructional program directed toward meeting the individual needs and differences of all students.

Opportunity for improving teacher competencies in this area has been made available through the Emergency School Assistance Program (ESAP) and the Elba City Board of Education.

The activities of the ESA program have been coordinated by Mrs. Helen McCollough, director; Elmer Taylor, superintendent; and Lamar Foley, principal.

## Swimming Lessons Are Planned At Local Pools

**RIVER POOL**

Free swimming lessons will be taught at the Elba City Pool this summer by Roland Powell. Sign-up dates will be during the week of June 5-11 between the hours of 11 a.m. to 6 p.m. The course is for non-swimmers only in the age group of first, second and third grades of the 1971-72 school years. Lessons will begin at 5 p.m. on June 12 at the pool.

**MULBERRY POOL**

Free swimming lessons will be taught at the Mulberry Heights Pool this summer by Frank Phillips. Sign-up dates will be during the week of June 5-11 between the hours of 11 a.m. to 6 p.m. The course is for non-swimmers only in the age group of first, second, and third grades of the 1971-72 school years. Lessons will begin at 5 p.m. on June 12 at the pool.

## BLOODMOBILE TO COME HERE ON MONDAY, JUNE 12

It takes all types especially young, could be the motto of the Coffee County Red Cross Bloodmobile. The Red Cross Bloodmobile will be at the Elba First Baptist Church on June 12 between the hours of 10:00 a.m. and 4:00 p.m. and they need the help of the entire town and surrounding area to make this visit a success. Donors who support the Blood Program are demonstrating their concern for human life - so show your concern by giving a pint of blood.

## AMERICAN LEGION TO MEET TONIGHT

THE American Legion and Auxiliary will have their regular monthly meeting Thursday night (tonight) June 8th at 7:30 P.M. at the Legion Home on the Troy Highway. All members are urged to be present.

## HERMAN DAHLKE NOW SELLING AT COOK CHEVROLET

Mr. Herman Dahlke is now associated with Cook Chevrolet as a car salesman. He and his family, the former June English, daughter of the former Probate Judge J. O. English, and daughter, Beth moved to Elba in February of this year from Dothan where they had resided for the past 8 years. They built a home on the Old Samson Road and their comment was "It's good to be back home."

Owner Drexel Cook said, "We are delighted we were able to attract Mr. Dahlke into our business. It is another step in our continuing efforts to get the very best people to serve our customers."

**REV. EDWIN R. SELLS**

The American people are caught up by interesting TV commercials. One that caught our fancy some years ago was a commercial that depicted with everyone not to be "half-safe". It has become a well known phrase with lots of people. A friend of mine commenting upon it said that

he didn't care what kind of deodorant his friends used—just so they used some! The phrase "don't be half-safe" says something to us. The point is well taken that our churches cannot afford the luxury of members who are not interested enough to give their time, talents and possessions to the work of the Lord. When we only attend and do not participate in other ways, we are only half-loyal. When we only give and never come to church without a professional reason, then our loyalty is not fully His. There are dozens of combinations such as these cited that mean we are only sharing a part

of us. The one factor that we cannot forget is that our Lord demands of us all. Jesus reminds us, "you cannot serve both God and mammon." This is also true in the case of our opportunities for worship. Dr. Pierce Harris, a former pastor of the First Methodist Church of Atlanta, used to tell people who never came to evening worship in their churches that they were missing half of what God had for them. We need to be loyal to our church whenever the opportunity is ours to work. It is shameful that so many churches have closed doors and lights out on Sunday evenings because of lack of participation. Empty pews are the devil's delight. Why don't you covenant with God and yourself to do better by your attendance at worship in your church on Sunday evening.

We can also be half-loyal about our concern for others. We need to be ready to let people know when we missed them. We should be willing to go out of our way to let another person know of Christ's love for them. Our world is wide open for more Samaritans. We cannot be the disciple that our Lord wants us to be unless there is genuine concern for our neighbor.

Loyalty is a good word but half-loyalty is a real spoiler. Don't let your church down yourself down, and your God down. Exercise your loyalty next Sunday!

Oil and gas have been discovered in two separate zones of an exploratory well 16 miles west of Ardjuna Field, offshore Indonesia, by the Atlantic Richfield Co., New York.

## "PUT COPPER ON PEANUTS!"

Every peanut state recommends it!

## Better still, use KOCIDE® 101!

It's the best copper in peanut history.

Here is the first — the ONLY — copper that comes in sub-micronic particle size to mix completely and stay in suspension until the whole tankful is sprayed. Here is the first — the ONLY — copper that gives complete coverage of the plant — sticks to the plant with no additional surfactants needed. Here is a copper that has no residual tolerance restrictions. Here is a copper that will not corrode equipment, ground or air. KOCIDE 101, the peanut copper that controls Leaf Spot most economically.

For generations copper has been protecting peanuts from disease—particularly Leaf Spot. It is the one — the ONLY fungicide proved de-

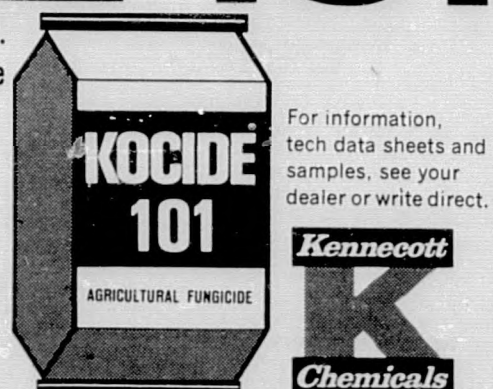

pendable in years of heavy infestation and economical in years of light infestation. THE TRI STATE TESTS OF LAST YEAR PROVED ONCE AGAIN THAT COPPER—KOCIDE 101—PRODUCED HIGHEST QUALITY PEANUTS WITH THE HIGHEST AVERAGE DOLLAR VALUE PER TON AT THE LOWEST COST-PER ACRE FOR MATERIAL.

Average \$-Value-Per-Ton (3 Harvests)		
	Georgia	Alabama
KOCIDE 101	\$299.32	\$300.25
Benlate	299.30	296.94
Bravo	297.17	297.57

**"Put Copper on Peanuts!"** Every peanut state recommends it. Better still, put

## KOCIDE® 101

on YOUR peanuts. It's the remarkable copper from Kennecott. Your dealer has it. Pick it up or have him drop it off—and make the growing as great as it can be this year.

## This Age Of Change Challenges Americans To Be Builders

JIM ALLEN

anged, nor have the immortality of the soul; the Gospel message, the reality of heaven, of sin and our susceptibility to sin and the wages of sin; the inevitability of death and the judgment; the need to pray and the power of prayer; the hope and the availability of salvation. None of these things which I feel need serious consideration by all Americans, young and old.

Some years ago Dr. Werner von Braun said that man's store of knowledge doubled in the 151 year period from 1750 to 1900, that it doubled again in the next 50 years; that it doubled again between 1950 and 1960, and that it would double still again in only 7 years after 1960.

There is an explosion of population. It has been estimated that at the time of the birth of Christ there were 250 million people in the world. By 1776, the world population had risen to 850 million people, and had doubled by 1914. It is estimated that by the year 2006 the world's population will have doubled again to 7 billion 200 million.

I relate these facts to point out that the evidences of change are all about us—on the moon, live television from outer space as well as from any point on earth, airplanes traveling faster than sound; nuclear bombs and nuclear power; radio, computer, heart transplants, to mention a few.

But God's love hasn't changed. In the area of individual responsibility to live in peace and harmony with his fellow man, there has been no change for the better. In the area of individual responsibility to live in peace and harmony with his fellow man, there has been no change for the better. In the area of individual responsibility to live in peace and harmony with his fellow man, there has been no change for the better.

It is in areas such as these that all Americans are challenged and in which our young people, especially can make their influence felt. To the graduates, let me not only encourage you, but urge you, as you live out your lives, and as you participate in shaping the decisions and conduct of your fellow man, to be builders and not wreckers. Builders have built this country and made it great. It will not be abandoned to wreckers. Each of us must do our part.

Dear Senator Sparkman: The wives of World War I veterans in my area recently had a meeting. At this meeting we agreed to write you on behalf of \$-3070 which would benefit these older veterans. I ask your support for this measure when it comes up for a vote. J. S. Fayette

Sparkman: You know of my long support for measures beneficial to veterans and their families. The bill to which you refer provides \$6.56 million in pensions for World War I veterans, and is now pending before the Senate Veterans Affairs Committee. While no action is scheduled on the bill at present, I am hopeful that the Committee will favorably report this measure in the near future.

Dear Senator Sparkman: I join all National Guard Technicians in thanking you for the Senate's support of a \$85, giving full credit for technician service prior to January 1969.

## Money Or Federal Financial Assistance Programs

THE Small Business Administration is the main federal agency designated to advise and assist the nation's small businesses. The SBA assists all types of small business—manufacturing, wholesaling, retailing, service and other firms. The determination of a small business is that the business is independently owned and operated and does not dominate in its field. Businesses are further classified by size according to the number of employees, 250 for manufacturing, and annual sales, \$1 million, and for other business activities.

The best known assistance program is the Business Loan, which may be borrowed directly from the SBA or from private sources, with an SBA guarantee of up to 90 percent of the balance. The business loan may be for a period of up to 10 years with a maximum amount of any loan determined by the Small Business Administration: \$350,000 is the maximum amount of any loan, and the loan may be used to (1) purchase machinery, equipment, facilities and supplies, (2) provide working capital, and (3) finance business construction and conversion or expansion of facilities.

The next major direct loan program is the Economic Opportunity Loans and are available to provide assistance to low income persons or those economically disadvantaged who cannot secure credit from any other source. Management Assistance Programs are available under this program, and may be required, in some cases, as a precondition to the loan.

The Lease Guarantee program is the newest financial assistance program available from the federal government. A lease guarantee is in the form of an insurance policy issued to a small business-man, guaranteeing rent payments. The minimum guarantee is for five years, and the longest is 20 years, and is designed to enable the small business owner to obtain certain business locations which would not be available under ordinary lease arrangements.

These three financial assistance programs, supervised by the Small Business Administration, are a portion of a long list of aid programs available from the federal government. The various programs cover subjects from business development to international commerce, with general information on these programs available in the Handbook for Small Business, published by the Government Printing Office.

Can we blame God for the shooting of George Wallace? The answer to this question is yes. This evil deed can be blamed on God because we have his confession in Isaiah 45:7 that He is the author of evil. His "confession" reads as follows:

"I form the light, and create darkness: I make peace, and create evil: I the LORD do all these things." (Isaiah 45:7)

wood, Frankie Johnston, Larry Crawley, Bonnie Herling, and Sanders' own son Kenneth who is farming with him full time. Of course, a lot of young people and others, too, would like to get into farming. One of the main difficulties in getting enough money to buy equipment, land, housing, and other things needed for farming, I believe that farming which includes all types of crops and livestock will become much more prestigious in the years ahead.

**AGRICULTURAL STATISTICS**

During the month of June 9 number of people throughout the state will be interviewing farmers to get agricultural information. This material is required by state law. Mr. George Strong of the Statistical Office in Montgomery is in charge of this program.

In Coffee County two people will be interviewing farmers and home-owners. These include Mrs. Horace Sessions of Route 3, Elba, and Sam Gibson who lives in Butler County. I don't know Mr. Gibson, but I know Betty Sessions will certainly do excellent work in getting the agricultural statistical facts. I certainly hope everyone will cooperate with both Mrs. Sessions and Mr. Gibson.

**COOPERATION**

Lots of folks make Extension work pleasurable for us in our county. Two men in Elba have gone out of their way the past several years to help with the District 4-H Livestock Judging Contest for beef cattle and hogs. We are indebted to W. H. Taylor and his wife Doris for making all classes of beef cattle available for judging. We have 4-H club members coming in from about 17 counties in this area to his farm. It takes a lot of work on his part to get these animals penned, numbered and gentled.

We are also indebted to Carlton Larkins of the Frost Morn Meat Buying Station. For a man about 17 counties in this area to his farm. It takes a lot of work on his part to get these animals penned, numbered and gentled.

One of the things that have the agriculture in Coffee County is the abundance of credit. We have the Bank of Kingston, The Peoples Bank in New Brockton and Elba, The Elba Exchange Bank, The Elba Bank, and other industries in the county and we also have good agricultural products.

A lot of counties don't have this favorable situation. One of the things that have the agriculture in Coffee County is the abundance of credit. We have the Bank of Kingston, The Peoples Bank in New Brockton and Elba, The Elba Exchange Bank, The Elba Bank, and other industries in the county and we also have good agricultural products.

**AGRICULTURAL CREDIT**

A lot of factors go toward making up a great county. I spoke to the Elba Rotary Club Monday and pointed out that Coffee County is fortunate in having both employment opportunities at Dorsey, Fort Rucker, and other industries in the county and we also have good agricultural products.

**REDUCE RISKS**

Someone has said, "The secret of life is to reduce your worries to a minimum." I will paraphrase this and say of the secrets of growing peanuts is to reduce risks to a minimum. One way to do this is to get on a leafspot control program and continue for the next three months. We are recommending that the first application be applied when the peanuts are six inches wide. A lot of folks have already applied and some should have started two weeks ago.

Just about every farmer knows he will have enough problems during the growing and harvesting season even when he eliminates as many risks as possible. For example, right now we are quite worried about the need for rain on some of the older corn. Some of this corn will begin to hurt badly by the middle of the week if rain doesn't come.

**GULLIES TO WATERWAYS**

Today's modern farmer realizes the importance of long rows. Many fields in Coffee County have short rows because of gullies, both large and small. Replacing these gullies with a good sod waterway that can be crossed with modern farm equipment can increase row length and save time. Waterways also reduce soil erosion and the amount of sediment reaching our streams and lakes.

Another important fact to remember is that planting grass in a waterway requires more seed than planting a field. A good rule to follow is to use twice as much seed and fertilizer as you would normally use in field plantings.

**BALANCED PONDS**

There are two main reasons for many of our bream-bass ponds getting out of balance—not enough fertilizer and over-fishing the bass.

A regular fertilizing program is a must for fish to grow and to keep down weeds. If too many bass are caught, the bream population becomes overcrowded. When this occurs, the bream are too many and too little.

Fisheries Biologist, Merrill Nail, will be checking ponds for balance in our county this month. Others will be checked as requests are made and time permits.

To buy a good suit of clothes in the Soviet Union takes 188 hours of work; in France, 75 hours; the United States, only 24 hours—because of productivity.

"Sure, we have a request—get lost!"

## Our man in charge of Public Relations.

He's the installer-repairman. But there's a lot more to his job than installing your phone and keeping it working. Because he's probably all the phone company you'll ever meet, he also knows a thing or two about meeting the public. He's the kind of guy you don't mind inviting into your home. (And the kind of guy who'll wipe his feet before he comes in.)

He's courteous and he's efficient... the kind of guy who can handle about 14 service calls a day without blowing a fuse. He's the heart of the telephone operation. Without him we wouldn't be in business. So you can be sure that doing business with him will be a pleasure.

200 Years of Freedom

What does it mean to you? With every issue we publish, this newspaper celebrates 200 years of freedom for a free press—by offering you freedom of choice. In our editorial columns, yours is the freedom to follow the news, to form and choose your own opinions, based on all the facts, to choose what interests you from news about sports, society, local business activities, local events... and much more.

Thanks to local advertisers, this newspaper brings you the freedom to compare and choose from advertised values... everything you need to wear, to decorate your home and keep it in shape, to feed your family, find entertainment... and much more. From our classified ads you're free to choose a home, buy a car, rent a tool, get a job, sell, hire, exchange... and much more. It's your freedom... choose it!

The Elba Clipper

Doctor  
in the Kitchen®by Laurence M. Hersh, M.D.  
Consultant, National Dairy Council

## MALNUTRITION AND MENTAL DEVELOPMENT

Does early malnutrition affect the developing brain? We've talked about this before. But the subject is so important that it bears further discussion.

Speaking at a recent National Dairy Council meeting, Dr. Myron Winick of Columbia University College of Physicians and Surgeons in New York said:

"The human brain undergoes a series of changes during its development, increasing both in cell number and in cell size. Under nutrition during the time that cell division is taking place (up until eighteen months of life) will retard the rate of cell division and result in a permanent reduction in brain cell number."

Dr. Winick is Professor of Pediatrics and Director of the Institute of Human Nutrition at Columbia. He is eminent in his field and has studied the situation extensively both in the United States and in South America.

**Malnutrition Defined**

In defining malnutrition, Dr. Winick stated that he was referring to a protein-calorie deficiency in animals, where it had been possible to conduct a series of studies over a period of years. Protein-calorie deficiency evidenced itself by producing a high degree of "emotional" or a malfunction of the nervous system that produced abnormal behavior. Where such abnormalities occurred early in life, they were permanent. In humans, such detailed studies have not been possible. Also, malnutrition seldom occurs as an isolated factor. It is usually found in a lower socio-economic

environment, accompanied by poor housing and sanitation, crowding and a prevalence of parasitic disease which can influence mental development.

"But we do know," Dr. Winick said, "that malnutrition, as part of the overall socio-economic milieu from which these children come, also can result in certain functional changes which persist even if adequate nutrition is subsequently taken."

**Much To Be Learned**

He is still doing much work in this area, Dr. Winick says. Much remains to be learned. Whether observed changes in the infant brain can be attributed to malnutrition per se or to malnutrition plus other socio-economic factors is still unclear. But one thing is for sure: "The infant brain is vulnerable to the effects of early malnutrition. Nutritional priorities must be shifted to stress infancy and pregnancy as special times of life when optimal nutrition is imperative," Dr. Winick added.

In addition to gathering more information about overall nutrition in brain development, Dr. Winick is specifically delving into the area of nutrition supplied by milk and milk proteins. He is being aided in his studies by a National Dairy Council nutrition research grant.

This is very important research since milk is the sole food in early infancy and it is of vital, continuing importance thereafter. Milk is also one of our best sources of first-class protein — so called complete protein.

Michael H. Beasley, English instructor, served as Commencement Marshal, and Charles Smith, chairman of the Fine Arts Division, provided organ music for the event.

Dean of Instructions Joseph D. Talmadge presented the graduates and President Forrester awarded 133 degrees and certificates to this year's graduating class.

For the first time in the junior college history, ten Associate in Applied Science Degrees in aviation were awarded to students who participated in the cooperative program between the junior college and Alabama Institute of Aviation Technology at Ozark.

Receiving degrees or certificates were: ELBA - Associate in Arts Degrees - Patricia Ann Hatcher and Brenda Gail Kidd; Associate in Science Degrees - Robert Donald Johnson, Computer Science Certificate - Larry D. Pope; Graduates in Absentia - Wilson Mobley, Jr., and Jimmie Daniels. Kemro Pearce and John Rickie, Jimmy W. Fussell and Ann Barley, NEW BROCKTON; and Lydia Galimore Flowers, of BRUNNIDGE.

Nearly 1,000 students will receive degrees from Troy State University during graduation exercises June 9. TSU registrar Jeff McClain announced this week.

The graduating class of 959 includes 769 bachelors degree candidates, 186 masters degree candidates, and 4 associate degree candidates.

Students receiving degrees from this county include: Bachelors Degree - ELBA - Charles Jeston Cowen, Cheryl Ann DeVane, Mary Sue Griffin, Jane Kendrick Hamm, Gussie Helms Lee, Nickie Jay Mack, Rickie Ray Mack, Carolyn Ann Marler, Farrah Moore Reynolds, and Raymond Orrell Weeks - NEW BROCKTON - Patricia Galande Blissette and James Shelby Lunsford.

Receiving Masters degrees were Linda Wood Rogers and Hilda Holley Smith of Kinston and Thomas Bryant Steele, of New Brockton.

ESJC Awards  
133 Degrees  
Friday Night

"A college degree, be it an Associate, a Bachelors', or even a doctorate, is not a passport to success, and may be useless if you do not build on a foundation of character," Dr. LeRoy Brown, State Superintendent of Education told the graduates at the Sixth Commencement Exercises at Enterprise State Junior College, Friday, June 2, 1972.

Dr. Brown urged all the graduates to build their lives on a strong foundation of honesty and integrity. He said that he would be willing to trade places with them because of the great opportunities awaiting them to correct the imperfections in our world.

"Take these imperfections," he said "use them as a challenge, guard against over-criticism and selfishness, and apply your energies to serving your fellowman. In the process you will achieve happiness and success."

Following Dr. Brown's address, Robert D. Johnson, president of the Student Government Association, responded with thanks from the graduates for the assistance given them by instructors, administrators, and citizens of Alabama in "making this phase of our education possible."

The invocation was given by Rev. Frank Wells, Pastor, Enterprise First Baptist Church. B. A. Forrester, president of ESJC, presided and introduced the speaker and guests, including Mrs. S. A. Cherry, 3rd District Representative on the State Board of Education, who brought greetings from the board.

Michael H. Beasley, English instructor, served as Commencement Marshal, and Charles Smith, chairman of the Fine Arts Division, provided organ music for the event.

Dean of Instructions Joseph D. Talmadge presented the graduates and President Forrester awarded 133 degrees and certificates to this year's graduating class.

Bill Brown, Director of computer science at Enterprise State Junior College demonstrates the new key punch machine to be used in training key punch operators in a new course set for fall quarter 1972.

## New Data Machines Received At ESJC

A new key punch Data Recorder and a card Sorter have been installed at Enterprise State Junior College to modernize and speed-up the data processing system and prepare for a key punch course to be offered fall quarter.

"We have another key punch machine and a faster reader than the one we had," said Bill Brown, Director of computer science at Enterprise State Junior College. "The new machines will be used in training key punch operators in a new course set for fall quarter 1972."

The new IBM Key Punch Data Recorder is the latest model available. It is fully electronic rather than mechanical, can be used for both key punch and verifying, makes less errors, and is the type that future graduates will be using when they are employed in Data Processing throughout this area.

With the acquisition of the new key punch machine, Autrey feels that the junior college is ready to offer a key punch operators course. "There is a great demand on our area for qualified key punch operators and we are prepared to offer this training fall quarter 1972. Further information on the course may be obtained from the Registrar's Office."

The new IBM 083 Sorter recently installed can sort 1000 cards per minute compared to 250 per minute on the old machine and is the type used in the computers centers throughout the area. "This model will help speed up internal data processing at the college and will broaden learning opportunities for our students."

Bill Brown, Director of computer science at ESJC, said, "This model will help speed up internal data processing at the college and will broaden learning opportunities for our students."

Autrey said, "The new IBM 083 Sorter recently installed can sort 1000 cards per minute compared to 250 per minute on the old machine and is the type used in the computers centers throughout the area. 'This model will help speed up internal data processing at the college and will broaden learning opportunities for our students.'"

## Chapter Met At ESJC On May 26

The Alpha Upsilon chapter of Alpha Delta Kappa met Thursday, May 26, 1972 at the Enterprise Junior College. Mrs. Celeste Kelley, Mrs. Theima Martin, and Mrs. Sandra Thornton served as hostesses. A delicious dessert was served to twenty-six members.

New officers were installed during the business meeting. Following the conclusion of this year's business, Mrs. Eric Crook gave a very interesting and informative speech on Mrs. Rose Kennedy.

Members who attended the meeting included: Mrs. Frances Prior, Mrs. Pearl Annis, Mrs. Judith Butts, Mrs. Natalie King, Mrs. Patsy Britt, Mrs. Sandra Thornton, Mrs. Celeste Kelley, Mrs. Pauline Allen, Mrs. Clara Ann Dyess, Mrs. Eric Crook, Mrs. Kitty Johnson, Mrs. Dixie Deal, Mrs. Mary Carney, Mrs. Jean Hudson, Mrs. Caprice Crook, Mrs. Judy Killingsworth, Mrs. Pat Clark, Mrs. Louise Bozeman, Mrs. Freddie Pierce, Mrs. Elizabeth Dyess, Mrs. Nellie Martin, Mrs. Sylvia Padgett, Mrs. Nollie English, Mrs. Pat Powell, Mrs. Theima Martin, and Mrs. Kitty Ruth Cole.

Members who attended the meeting included: Mrs. Frances Prior, Mrs. Pearl Annis, Mrs. Judith Butts, Mrs. Natalie King, Mrs. Patsy Britt, Mrs. Sandra Thornton, Mrs. Celeste Kelley, Mrs. Pauline Allen, Mrs. Clara Ann Dyess, Mrs. Eric Crook, Mrs. Kitty Johnson, Mrs. Dixie Deal, Mrs. Mary Carney, Mrs. Jean Hudson, Mrs. Caprice Crook, Mrs. Judy Killingsworth, Mrs. Pat Clark, Mrs. Louise Bozeman, Mrs. Freddie Pierce, Mrs. Elizabeth Dyess, Mrs. Nellie Martin, Mrs. Sylvia Padgett, Mrs. Nollie English, Mrs. Pat Powell, Mrs. Theima Martin, and Mrs. Kitty Ruth Cole.

## Lucky Nine

A broken drill bit made nine years of wearing safety glasses on the job pay off at Northrup Aviation Corp., Hawthorne, Calif. Working with his partner on a plane's cargo door, Gerry Alexander heard a pop and felt a jar and saw his left frame glass completely shattered. His dil- ige- nce prevented the loss of an eye.

The Atlanta Braves hitters seem to have their eyes on the ball lately. And as a result, the Braves are moving up in the standing. However, Laman Harris is still pointing about his pitching, and rightly so. Atlanta usually needs eight to ten runs a game for a sure win, and there are too many good hurlers on the other clubs to count on that.

By the way, Harris is not the only one in the Atlanta organization who is pointing. Ralph Garr, on regional television, threw a temper tantrum last Friday night when Phil Miskro failed to score from second on his single through the middle. It was obvious that Nisko could not have made it, and actions such as Garr's are part of the problems the Braves face. If more of them would worry about winning games and not about how many RBIs went to their credit, the Braves would be a much better and more interesting team.

On the local baseball front, I've had several opportunities recently to watch our Dixie Youth League in action, and I enjoyed every minute of it. There are some very smooth athletes growing up in this city, and with the proper kind of encouragement, the results of our Little League program will show in a few years.

And while we're on this subject, compliments are in order for the parents of these youngsters. It is a rare exception that you go to a Little League game in any city when you don't see someone in the bleachers trying to do the coach's or the umpire's job. But as far as I have seen, Elba is that exception. May I suggest that we stay this exception. Its surprising how much more we will enjoy the game.

Doug Sanders, the "Walking Rainbow", proved last Sunday that he is not afraid of the young long-knocksers on the pro tour nor the pressure of a head-to-head battle with Lee Trevino. Doug got his "telephone booth" swing going again, and picked up \$5,000 first prize in the Kemper Open in Charlotte, North Carolina.

A little side-note on Lee Trevino, second place finisher shows that it doesn't say to much before the press people. Lee said after Saturday's round at the Kemper that difference in his scores was that "I'm making all of my five and six putts."

What does Lee do on Sunday? You guessed it, during the training, students

## Mayor Calls August 8 City Official Elections

City elections have been called in the City of Elba. Mayor Jack Brunson executed the proper papers and the official election call published in the legal notices in this week's issue of the Elba Clipper.

Qualifying for the office of mayor and the five councilmen places will begin today and the final day for qualifying will be July 5th (Wednesday). The election will be held August 8th. If a run-off is necessary, it will be held on September 12th, according to the official notice.

In contrast to past elections Councilmen will seek election by place number rather than by ward as has been done.

SENATOR SPARKMAN SUPPORTS LARGER S.S. INCREASE

Senator John Sparkman said today he is "highly optimistic" that Congress will approve an across-the-board 20 percent increase in Social Security benefits for 27.4 million elderly and disabled Americans.

Sparkman said he is "virtually certain" the Senate will pass a 20 percent increase, despite the fact that the Senate Finance Committee reported out a bill containing only a 10 percent increase.

Sparkman said more than 60 senators have joined in co-sponsoring an amendment to raise that amount to 20 percent. Such a move also has the support of Finance Committee Chairman Russell Long of Louisiana.

And while the House passed all contained only a 5 percent increase, Sparkman noted that House Ways and Means Committee Chairman Wilbur D. Mills of Arkansas has since come out for the 20 percent increase, which Mills said can be financed without a tax increase.

"Since Senator Long and Congressman Mills head the representatives Senate House conference appointed to work out a compromise bill, I am highly optimistic that Congress will eventually pass a 20 percent increase," Sparkman added.

It is his belief that the 20 percent increase is absolutely essential if we are to do justice to the elderly, retired and disabled persons who must depend on Social Security at the same time inflation continues to run rampant.

The 20 percent increase would raise the monthly benefits of the average Social Security recipient from \$153 to \$184. The average retired couple's benefits would be increased from \$228 to \$287 monthly.

FAMILIAR SCENE AT BLOODMOBILE

## POST OFFICE PLANS BIG CHANGES NEXT WEEK

The United States Postal Service - Area Mail Processing Center is to be initiated at the Elba Post Office within the next two weeks.

This was announced today by Carl C. Usaker, Regional Postmaster General, Southern Postal Region, which covers the Southern United States from Texas to Florida.

"The program is intended to speed the ultimate delivery of the mail and to gain maximum efficiency and economy through full utilization of Dothan, Al Post Office within the next two weeks."

Usaker pointed out, "is a Sectional Center Facility, and the new system will revolve entirely around that capacity and that function."

"The Dothan Post Office," Usaker pointed out, "is a plan whereby virtually all mail originating within a Sectional Center Area, including any or all of the associate offices of the Sectional Center Facility, will be consolidated at the SCF for complete preparation and processing for street delivery."

All mail deposited in street letter boxes or the out-of-town letter drops at the associate offices will be transferred to the SCF for processing and will bear the postmark designated for the SCF area.

The Dothan SCF postmark will read, "U.S. Postal Service, AL 363, along with the date and AM-PM designation. The city postmark of Dothan, and each individual associate office will not be changed."

Mail deposited in a designated drop unit at a post office or a letter box labeled "For Local Cancellation Only" will be postmarked at the local office of origin with the name of that office. Each postmaster will have deposit boxes and letter drop units designated for this purpose. All metered mail will bear the postmark of the office of origin.

It was emphasized by Usaker that no office will lose its local postmark.

He asked specifically that customers no longer use the word "City" as an address in place of the name of the city of destination. "Obviously," he said, "in this new system, a letter with just 'City' could lose its identity."

Post Offices affected by this

## MORE JOB OPENING ARE ANNOUNCED BY STATE OF ALA.

EXAMS

The Alabama State Personnel Department this week announced examinations for filling present vacancies in the following positions:

Clerk Typist III (\$5,733-\$7,527)  
Clerk Typist III (\$5,733-\$7,527)  
Clerk Stenographer III (\$5,019-\$7,878)  
Air Administration and Training Officer (\$9,321-\$11,492)  
Records Management Specialist (\$9,321-\$11,492)  
Institutional Food Service Specialist (\$9,321-\$11,492)  
Assistant Grain Elevator Superintendent (\$12,246-\$15,434)  
Grain Elevator Manager (\$12,246-\$15,434)

## PEE WEE BASEBALL

All boys ages 6-9 interested in playing Pee Wee baseball should be at the Elba Little League Park (next to Cook Chevrolet) on Thursday, June 22 at 10 a.m.

Only 15 boys showed up for the Tuesday morning meeting. The league must have at least 25 members or the program will be discontinued. All boys are urged to attend.

## FIRE TRUCK

The Elba Police Department has issued a plea to the public about following emergency vehicles. According to Chief Smart, the department understands the natural curiosity and concern during emergencies but urge that those not involved in the emergency crews plenty of room to handle their work in the lastest way.

## Agent Nominated For National Awards

County Extension Chairman Thomas C. Cassidy of Enterprise has been selected by the Alabama Association of County Agricultural Agents as one of its four nominees for national distinguished service awards.

Others nominated are Thomas J. Gerald of Hayneville, William Joel Thompson of Heflin and Harold W. Warren of Russellville. All are county staff members of the Auburn University Cooperative Extension Service.

Extension Farm Agent Earl Hall of Huntsville will present certificates to the four in Huntsville June 9 at the annual meeting of the state association, they will then become Alabama's choices for distinguished service awards to be given this fall in Atlanta Georgia, by the National Association of County Agricultural Agents.

Cassidy joined Extension 23 years ago as assistant County agent in Coosa County. He helped organize the Coffee County Hog Producers Association, which keeps the county to the entire agricultural community up to date on management, feeding and breeding.

He has developed and maintains an active relationship with the county governing body, the Coffee County Farm Bureau, USDA agencies and commodity groups in the county and area.

Cassidy received the B.S. and M.S. degrees from Auburn University. And he has done graduate work at Colorado State University and the University of Arkansas.

## POLICE DEPT LAUNCHES DRIVE AGAINST STRAYS

Police Chief Jack Smart has announced that beginning Monday June 19, a campaign would begin to pick up all stray dogs in the city of Elba. This program will last two weeks and all dog owners are urged to be sure their dog has a collar and current rabies tag. Those dogs which do not have both these and are not tied at someone's house will be picked up and taken to the pound - no questions asked.

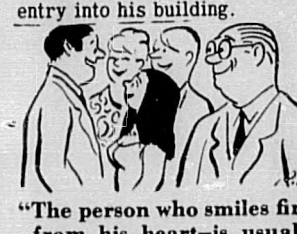

When a dog is taken to the pound there is a pound fee of a rabies shot that will be given to all dogs released from the pound.

Using a different method of operation, Nasco Equipment Co. was broken into recently and about \$150 taken, mostly in silver. Manager H. P. Bone expressed an opinion that someone had a key to gain initial entry into his building.

Several days before, an attempt was made to enter Haley's American Service Station across from the Elba Clipper. Owner Frank Haley had to replace most of the door's hardware but the culprit failed to gain entry to his station.

Using a different method of operation, Nasco Equipment Co. was broken into recently and about \$150 taken, mostly in silver. Manager H. P. Bone expressed an opinion that someone had a key to gain initial entry into his building.

Several days before, an attempt was made to enter Haley's American Service Station across from the Elba Clipper. Owner Frank Haley had to replace most of the door's hardware but the culprit failed to gain entry to his station.

"The person who smiles first from his heart is usually the last to be lonely."

## NAMES OF SPECIAL OLYMPIC WINNERS

Forty five students from Elba competed in the Southeast Alabama Special Olympics at Troy State University April 15, 1972. Each student entered two events.

First Place Winners: bottom row: Ronnie Cooper, Melissa Price, Carolyn Black, Shelly Stackhouse, Greg Fuller, Glen Gray, Larry Burke, Howard Flowers, Owen Coleman, Mary Hunter, Elizabeth Chism, Annette Hill, not pictured M. J. Caldwell.

Second Place Winners: Peggy Johnson, Penny Hooks, Jerome McNair, Lazine Warren, Larry Burks, Jackie Boswell, Patsy Medley, Steve Cox, Debra Bess, Ronnie Money, Owen Coleman, Amelia Thomas, Ruth Culver, Sarah Young, Darnett Lee, not pictured Willie Flowers.

Third Place Winners: Peggy Johnson, Penny Hooks, Jerome McNair, Greg Fuller, Virginia Hill, Shelly Stackhouse, Peggy Stackhouse, Becky Sanders, Melissa Price, Lucy Wright, Keith McSideran, Ronnie Money, Judy Bryant, Sandra Reynolds, Copeland Medley, Johnnie Coleman, Donnie Sanders, Ruth Culver, Sarah Young, Darnett Lee, Elaine Black, and Debbie Black.
